EXPERIENCE

Software Developer

ACRET Philippines Inc. | 2023 - Present

- Build websites from design documents, ensuring they align with client goals.
- Use Drupal CMS to manage data, implement features, and handle traffic.
- Extend Drupal functionality with custom PHP modules.

Product Set-up Engineer (Graphics)

Northern Lights Technology Development
2017 - 2022

- Deliver high-quality, attention-to-detail products to customers without requiring QA, enabling faster project turnover and expansion of the graphics team.
- Address complex customer requests and share solutions with the team to boost efficiency and productivity.
- Work includes developing web app-generated templates for business cards, letterheads, envelopes, notecards, and an e-commerce platform for these products.
